

TECHNICAL DATA SHEET

PRODUCT:

PK Metallic Foil for plastic applications.

DESCRIPTION:

PK quality has been developed for hot stamping various plastics, such as PVC, PP, PE, BS and PET.
This foil is scratch and wear resistant and alcohol proof.
This foil is suitable for stamping at high temperature.

APPLICATION:

Various plastic applications.

MACHINES:

Vertical hot stamping presses.
Peripheral hot stamping presses.

DEFINITION:

Medium to large.

RECOMMENDED STAMPING TEMPERATURES:

180-210 °C (vertical hot stamping press).
170-210 °C (peripheral hot stamping presses).
